Kalmar, part of Cargotec, offers a wide range of cargo handling solutions and services to ports, terminals, distribution centers and to heavy industry across the globe. Kalmar is the industry leader in terminal automation and energy efficient container handling, with one in four container movements around the globe being handled by a Kalmar solution.

Kalmar and Microvast have extended their supply and purchase agreement through 2026. "2021 marked a considerable milestone for Kalmar as its entire portfolio became available in electrically powered versions. As our strategic battery partner, Microvast's battery technologies have been successfully integrated into four of our platforms to date. We value this strategic relationship, which gives us a performance edge and supports our position as a leader in our industry. Microvast's European production footprint and strong focus on sustainability also align with our longstanding corporate goals," says Alf-Gunnar Karlgren, VP Counter Balanced at Kalmar.

"We are proud to support Kalmar on their electrification journey. With our new Gen 4 MV-B and MV-C packs, offering approximately 20% more energy and power compared to the Gen 3 packs, we are positioned to continue delivering better performance and improved TCO in Kalmar's future product lineup. With our technology roadmap and deep understanding of Kalmar's business, we look forward to many more years of close cooperation," says Sascha Kelterborn, President and CRO of Microvast Holdings, Inc. The MV-B and MV-C Gen 4 packs are powered by Microvast's new MpCO-48Ah (high power) and HpCO-53.5Ah (high energy) cells. Microvast has been the first battery company conducting TÜV Süd's sustainability assessment program.

### About Microvast

Founded in Houston, Texas in 2006 as a research and technology driven company, Microvast has evolved into a global leader in the design, development and manufacture of battery solutions for mobile and stationary applications. Microvast provides a broad portfolio of fast-charging lithium-ion battery solutions, with different chemistries, performance characteristics and price points to meet the diverse requirements of its customer base. Microvast is renowned for its cutting-edge cell technology and its vertical integration capabilities which extend from core battery chemistry (cathode, anode, electrolyte, and separator) to battery cells, modules and packs.

Since placing its first battery systems in operation in electric buses more than a decade ago, Microvast has expanded its business to serve a broad range of commercial, passenger and specialty vehicles, including mining,

material handling, and power vehicles and equipment, as well as grid-scale energy storage applications.
